Skills

Languages: C/C++, Python, JavaScript, SQL

Technologies & Tools: HTML, CSS/Bootstrap, Django, AWS, Oops, React.js, MS Office, Git/Github, Agile, Jira, RDBMS, Rest API, Linux, FastAPI

Work Experience

Radixcube Solutions Pvt. Ltd., Remote

September 2023 - July 2024

Junior Software Developer

- Executed detailed analysis of tech support processes related to API authorization, identifying key areas for improvement that increased overall project efficiency by 30% and streamlined communication between teams.
- Reduced cost involved in running custom reports service by more than 80% by devising an automated system that identified and disabled reports with no usage or empty data.
- Python, Django, AWS, MySQL, React.js, Docker, Postman, Jira

Radixcube Solutions Pvt. Ltd., Remote

January 2023 - August 2023

Junior Software Developer Trainee

- Learned and Implemented Data Structure and Algorithms, Databases. Working on various projects using various coding methodologies.
- Python, Django, AWS, MySQL, React.js,

Praedico Global Research Pvt. Ltd., Gwalior

June 2022 - July 2022

Python Developer Intern

- Executed enhancements in existing projects using Python and Django frameworks while focusing on creating efficient backend support structures leading to reduced load times by 15% across all tested applications.
- Python, TypeScript, AWS, Django, React.js Elastic Search, TensorFlow

Education

Madhav Institute Of Technology and Science, Gwalior

August 2019 - June 2023

B.Tech. in Electronics and Telecommunication Engineering

CGPA: 7.82

Relevant Coursework: Object Oriented Programming(OOPs), Databases, Data Structures and Algorithms, Operating Systems, Computer Networks, Software Development life Cycle(SDLC)

Project Work

- **Word Lookup Dictionary** : Developed desktop software for online lookup of English words. Implemented efficient search of valid words using data structure. Implemented spelling correction and auto-suggestion using edit distance algorithm. Used web scraping to get the data for online lookup. Python,.
- **E-commerce Website**: Developed seamless integration of payment gateways into an e-commerce framework built with Python and Django, allowing secure processing for hundreds of transactions weekly without compromising system integrity or speed.. Technologies used : Python, Django, Sqlite
- **Counting Object in a Image**: -Implemented an innovative computer vision solution for accurate object detection within images; achieved an impressive count accuracy rate above 95% using advanced techniques with Python-based tools including OpenCV and CV.. Technology used: Python, Python libraries like OpenCV, NumPy, MATPLOTLIB, CV
- **Arduino Based 4-way traffic light controller with emergency vehicle pre alert**: --Developed comprehensive documentation outlining functionalities of the 4-way traffic light model which identified critical factors affecting urban congestion while demonstrating potential solutions to improve city transport efficiency across local agencies.. Technologies: Arduino IDE, Proteus 8 professional Technology.

Certification

- Python Programming - Udemy
- Basics AWS on Udemy
- Basics of Html, CSS and Javascript on Udemy
- Sql on Udemy
- NCC 'C' Certificate Holder
