

JEET VYAS

ACADEMIC PROFILE

Degree/Certificate	Institution	Percentage/CGPA	Year
B-Tech	Mechanical Engineering IIT (BHU), Varanasi	7.71	2025
CBSE (XII)	D.A.V Public School , Bistupur	93.80	2020
CBSE (X)	Jusco School Kadma	94.40	2018

SKILLS

- **Tech Stack:** C, C++, JavaScript, Typescript, SQL, ReactJS, NodeJS, Express, Redux, MongoDB, Stripe, Git, Github
- **Areas of Interest:** Operating System, Data Structures & Algorithm, Classical Machine Learning, Problem Solving

INTERNSHIP/TRAINING

FrontEnd Developer Intern | StakeAtlas

05/2023 - 07/2023

Contributed to the development of an e-commerce website, overseeing all aspects from planning to implementation

- Developed **frontend components**, including the gallery carousel and other key features for the website, with **ReactJs**
- Reduced the **page load times** by **15%** through implementing server-side image processing algorithms in **Node.js**
- Engineered a robust **user authentication** system with advanced multi-level permissions using **Express.js, MongoDB**

Full Stack Development Intern | Seisei AI

05/2024 - 07/2024

Developed user components, authentication, and payment integration.

- Created components for effectively managing credits alongside user profile data using **React.js** with **Material UI**
- Implemented authentication and authorization using **JWT tokens, Google reCAPTCHA** besides **react-google-login**
- Integrated **Razorpay** for credit point allocation and developed server-side logic for efficient deallocation upon usage.

PROJECTS

FeedIt | Online Food Delivery Application

A web app that enables users to conveniently order food for delivery

- Built food delivery app with restaurant search, checkout through **Stripe**, shopping cart & admin panel for management
- Engineered a highly responsive UI with **React**, incorporating dynamic routing and state management using **Redux**
- Implemented backend with **Node.js** and **Express** for API handling & user management, using **MongoDB** for storage
Exposure React, Redux, Node.js, Express, MongoDB, Stripe [Link](#)

Telegraph | Full Stack Messaging Web App

A seamless messaging application for real-time online communication

- Developed real-time chat app using **Socket.IO** presenting group chat creation, personalized messaging & notifications
- Utilized **MongoDB** for efficient data storage, managing user profiles, messages, and group interactions seamlessly
- Secured the app with **JWT authentication** to ensure safe, reliable user access, protecting endpoints & sensitive data
Exposure React, Redux, Node.js, Express, MongoDB, Socket.IO, JWT, Bcrypt [Link](#)

Bank Churn Prediction Using Binary Classification

Assess whether a customer will retain or terminate their bank account

- Analysed banking datasets with **Pandas**, focusing on customer demographics, account balances, and product usage
- **Feature-engineered** the data to address an **80-20** class imbalance, correct skewness, and apply **one-hot encoding**
- Trained and fine-tuned **XGBoost Classifier** classifying **82%** of **33000** non-churned, **84%** of **9000** churned customers
Exposure: Pandas, Feature Engineering, Binary Classification, Feature Scaling [Link](#)

POSITION OF RESPONSIBILITY

- **Marketing Executive Technex'23** | Successfully executed data-driven marketing with seamless, targeted execution.
- **Marketing Coordinator Symphony'22** | Collaborated with artists, organizers, production staff to execute strategies

HONOURS AND ACHIEVEMENTS

- **Top 20** position among more than **1000** participating teams in the highly competitive **Frontend Fiesta 2023 NSUT**
- **Solved 600+ DSA problems** on **LeetCode**, demonstrating strong problem-solving and algorithmic skills.
- **Finished in the top 25 teams** in the Global Economics Case Competition (GECC) organized by **IIM Tiruchirappalli**
- **Secured a top 10 finish** in **Data and Beyond**, a renowned analytics case competition at **Vista 2023, IIM Bangalore**
