Professional Summary

Detail-oriented and dedicated software engineer with 2 years of experience at Persistent Systems. Proven ability in designing, developing, and maintaining software solutions. Adept at data processing, analysis, and system optimization. Seeking a Data Engineer position to leverage technical skills and contribute to the success of a forward-thinking company.

Education

Oriental College of Technology

Bachelor of Technology in Computer Science

Sep. 2018 – May 2022

Bhopal, Madhya Pradesh

Technical Skills

Languages: Python, SQL, PySpark

Data Engineering: Azure Data Factory, Azure Databricks, ETL processes, Data Warehousing, Data Modeling

Cloud Platforms: Microsoft Azure

Tools & Frameworks: Apache Spark, SparkSQL, Azure Synapse Analytics, Azure Data Storage, Azure Data Factory

Version Control: Git, GitHub

Other Tools: Microsoft Excel

OS: Windows, Linux(Ubuntu)

Experience

Persistent Systems

Software Developer 3.1

June 2022 – July 2024

Pune, Maharashtra

- **Data Architecture:** Designed and implemented the gold-silver-bronze layers concept, enhancing data management and retrieval efficiency.
- **Pipeline Development:** Developed and optimized data pipelines using Azure Data Factory for seamless data movement and transformation.
- **Script Conversion:** Converted U-SQL scripts to PySpark and SQL scripts in Azure Synapse, improving processing efficiency and compatibility.
- **Data Ingestion:** Managed data ingestion from on-premise SQL Server and Oracle databases to Azure Data Lake, ensuring secure and accurate data transfer.
- **Security Management:** Integrated Azure Key Vault for secure handling of sensitive data, ensuring compliance with data protection regulations.
- **Automation:** Automated data validation processes using SQL scripts, significantly improving data accuracy post-migration.
- **Security Management:** Integrated Azure Key Vault for secure handling of sensitive data, ensuring compliance with data protection regulations.

Projects

Olympics Data Analysis Pipeline : Azure Synapse, Azure Data Factory, PowerBI, PySpark

Jun 2024

- Ingested raw Olympics data from CSV files, APIs, and on-premise databases using Azure Data Factory, automating updates for real-time data integration.
- **Data Transformation:** Used PySpark in Azure Synapse to cleanse, standardize, and transform data, calculating key metrics like total medals by country and standardizing athlete names and country codes.
- **Data Aggregation & Storage:** Aggregated data by year, country, sport, and athlete, storing it in Azure Synapse Analytics for optimized querying and Azure Data Lake Storage Gen2 for organized layer management.
- **Analysis & Reporting:** Developed Power BI dashboards with Azure Synapse Analytics to visualize historical trends and athlete achievements, enabling interactive exploration of sports, countries, and years.
