Soft Skill

- Leadership
- Decision Making
- Teamwork
- Patience

EXPERIENCE

Node JS Developer

March 2024 – Present

Netzwala Services Pvt Ltd

- Developed REST APIs to connect the application with backend services.
- Designed and developed backend services to support a web application.
- Built full-stack applications using modern frameworks like Express.js, Bootstrap, and Foundation.
- Collaborated with cross-functional teams to ensure timely delivery of project milestones.

PROJECTS

Blog App

Jan 2024

- **Blog Management System:** Implemented a REST API for user authentication, blog creation, viewing, updating, and deletion, with distinct admin and user roles.
- **Technology Stack:** Node.js and Express.js for the backend, MongoDB with Mongoose for database schema modeling, and React for the frontend.
- **User and Admin Roles:** Admins can manage (create, edit, delete) blog posts, while users can view and interact with posts.
- **Secure Authentication:** Implemented JWT-based authentication for secure login and user sessions, with bcrypt for password hashing.

Expense Tracker App

Dec 2023

- **Expense Management System:** Implemented a REST API for user authentication, expense tracking, category management, and reporting, with role-based access control.
- **Technology Stack:** Built using React.js for the frontend, Node.js and Express.js for the backend, and MongoDB with Mongoose for database management.
- **User and Admin Roles:** Users can add, update, and delete expenses, categorize them, and attach receipts, while admins have additional management privileges.
- **Secure Authentication:** JWT-based authentication for secure login, with bcrypt for password hashing and middleware for protected routes.
- **Dashboard and Analytics:** Provides visual insights with pie charts and bar graphs to analyze spending patterns.

Product Affiliate (Live Project)

- **Technology Stack:** JavaScript, Node.js, Express.js, SQL, Sequelize, React.js, Redux.js.
- **Contribution:** Back-end developer.

Description

- Developed a product affiliate system allowing admins to create and assign theme-based affiliate links to customers.
- Implemented role-based user management, enabling admins to manage customers and their assigned affiliate links.
- Added functionality for admins to bulk assign or remove a specific affiliate from multiple customers, streamlining the affiliate management process.
- Utilized SQL with Sequelize ORM for storing customer data, affiliate links, and commission tracking.
- Developed a system to track clicks and purchases from affiliate links, automatically calculating and distributing commissions.

TECHNICAL SKILLS

Languages: JavaScript, Java

Frameworks and Libraries: Node.js, Express.js, Tailwind CSS

Tools and Technologies: MongoDB, Excel, API Integration, GitHub

CERTIFICATIONS

- Web Development from Scratch
- Advanced Diploma in Computer Applications
- AMCAT
