

# Sidharth Mahajan

Passionate Front End Developer with a talent for debugging and empowering aspiring coders

Burhanpur, Madhya Pradesh  
Zip Code : 450331  
**+917828068116**  
**sidharthmahajan74@gmail.com**

## INTERNSHIP

### Coding Ninjas, Remote — TA-Full Stack Web Development

MARCH 2024 - MAY 2024

#### Tasks

- Taking doubt sessions and debugging codes.
- Helping students with their assignments.
- I have provided invaluable assistance in code debugging and mentor students on various web development projects across diverse technologies.

## EDUCATION

### Thakur Shivkumar Singh Memorial Engineering College, Jhiri, Madhya Pradesh — B.Tech, Computer Science

August 2019 - May 2023

CGPA: 7.5/10

## PROJECTS

### Myntra Clone — E-commerce Website

**Technologies Used:** HTML, CSS (Bootstrap), JavaScript, React.js

- Developed a responsive Myntra-inspired e-commerce platform using Bootstrap for a mobile-friendly user interface.
- Implemented React.js components for dynamic rendering and improved UI/UX performance.
- Integrated JavaScript for interactive features like product filtering, sorting, and dynamic cart updates.
- Optimized the website's performance by using React hooks for state management and ensuring efficient component rendering.
- Designed and coded key sections including the product catalog, user authentication, and checkout process.

## SKILLS

**Languages:** Java, HTML5, CSS3, JavaScript, React.js

**Databases:** MongoDB

**Developer Tools:** VS Code

**Frameworks:** GitHub, Bootstrap

**Additional Skills:** DSA

**Soft Skills:** Communication, teamwork

## CERTIFICATES

**Introduction to JAVA - Coding Ninjas**  
Issued April 2023

**Data Structures in JAVA - Coding Ninjas**  
Issued June 2023

**Front End | Full Stack Web Development - Coding Ninjas**  
Issued August 2023

**Back End | Full Stack Web Development in Node.js - Coding Ninjas**  
Issued October 2023

**React | Full Stack Development - Coding Ninjas**  
Issued March 2024

## LANGUAGES

Hindi, English, Marathi

## **Todo App — Task Management Tool**

**Technologies Used:** HTML, CSS (Bootstrap), JavaScript, React.js

- Built a To-Do app using React.js to manage tasks with features like add, edit, delete, and mark complete.
- Utilized React hooks (useState, useEffect) for efficient state management and real-time task updates.
- Implemented local storage to persist user tasks across sessions for a seamless user experience.
- Designed a responsive UI using Bootstrap for cross-device compatibility and enhanced UX.
- Optimized component reusability by breaking down features into modular React components.

## **Amazon Front Page Clone — Ecommerce UI**

**Technologies Used:** HTML, CSS

- Developed a responsive replica of the Amazon front page using HTML for structure and CSS for styling.
- Implemented CSS animations and transitions for interactive elements like image carousels, category navigation, and search bar.
- Optimized CSS media queries for a fully responsive design, ensuring smooth functionality across devices.
- Created reusable components (product cards, navigation bar) to improve code efficiency and scalability.
- Enhanced user experience by adding hover effects, dropdown menus, and animated banners.
