SUMMARY

Passionate and detail-oriented **Software Developer** with a strong foundation in **Java, Spring Boot, and backend development**. Skilled in building scalable applications, designing **RESTful APIs**, and implementing security mechanisms like **JWT authentication**. Hands-on experience with **React** and **MySQL**. Quick learner, eager to contribute to impactful projects in a high-growth company while enhancing technical expertise.

TECHNICAL SKILLS

Programming Languages: Java, C++, JavaScript, SQL

Technologies/Frameworks: Spring Boot, Hibernate, J2EE, HTML5, CSS, Bootstrap, ReactJS, NodeJS, ExpressJs, MongoDB

Developer Tools: VS Code, IntelliJ IDEA, STS, Git

Theory Subjects: Data Structures & Algorithms (DSA), Database Management System (DBMS), Operating Systems, Object-Oriented Programming (OOPS)

PROJECTS

Courier Management System 🔗 | Spring Boot, React.js, Bootstrap, MySQL, JWT **2025**

- Developed a **Courier Management System** using **Spring Boot** and **React.js** with role-based access for **Admin, Agent, and Customer** modules.
- Implemented **JWT authentication** and **Spring Security** for secure user login and access control.
- Integrated **GraphHopper API** for route optimization, reducing delivery time by **15 minutes**.
- Designed **RESTful APIs** for parcel tracking and managed **MySQL** database operations efficiently.

Console-Based Pizza Order System 🔗 | Java, JDBC, MySQL **2024**

- Built a **console-based Pizza Ordering System** to streamline **customer orders** and **admin tracking**.
- Implemented **user authentication**, menu navigation, shopping cart, and optimized **JDBC-based database operations**.
- Designed a **relational database** with five tables: **pizza_customers**, **pizza_orders**, **pizza_items**, **pizza_pricing**, and **pizza_orderdetails** for efficient data management.
- Conducted thorough performance testing on the Pizza Order System, identifying and fixing three biggest causes of latency, which improved responsiveness of the system.

Movie Finder 🔗 | React.js, JavaScript, OMDB API **2024**

- Engineered a React-based movie search application that efficiently retrieves real-time movie details from the **OMDB API**, reducing loading times by 20% and enhancing user experience through optimized data handling.
- Designed a responsive UI and improved API performance using **React Hooks**.

EDUCATION

Sunbeam Institute of Information Technology, Hinjewadi **Sept 2024 – Feb 2025**
PG-DAC (CDAC) - Post Diploma in Advanced Computing *Pune, Maharashtra*

Modern Education Society's College of Engineering (MESCOE), Pune **2019 – 2023**
B.Tech - Mechanical Engineering *Pune, Maharashtra*

CERTIFICATIONS

- Alpha batch(DSA course) - Apna college 🔗
- Google cloud bootcamp - GFG 🔗
- Java Full Stack LIVE Course - Spark 2.0 🔗
