SUMMARY

Highly motivated and technically proficient recent post-graduate with a passion for Frontend development, Backend Development and MERN stack development and a strong foundation in web technologies. Eager to apply my skills and knowledge to create visually appealing and user-friendly websites. A quick learner with a keen eye for design and a commitment to delivering responsive and engaging web solutions. Excited to contribute to a dynamic team and grow as a front-end and mern-stack developer.

SKILLS

• HTML5	• MongoDB
• CSS3	• React
• Javascript	• Node.js
• Tailwind.css	• Express.js
• Bootstrap	• Git/Github
• Firebase	• Rest API's
• Next.js	• Typescript

INTERNSHIP

Ekka, Remote

Node.js Developer intern, Aug 2024 - Feb 2025

- As an intern at Ekka.com, I contribute to the development and optimization of backend systems using Node.js.
- My responsibilities include building scalable APIs, implementing secure data management practices, and enhancing server-side functionalities to support the company's product ecosystem.
- Collaborating closely with the team, I focus on writing clean, maintainable code and learning industry best practices to ensure seamless performance and a robust backend infrastructure for the platform.
- This experience allows me to deepen my understanding of server-side development, optimize application performance, and enhance my problem-solving skills in a fast-paced and innovative environment.
- I'm excited to learn and grow while contributing to the company's mission.

Baoiam Innovations, Remote

Junior Front end Developer , June 2023 - August 2023

- I will dive deep into the core technologies that power modern front-end development.
- I will gain proficiency in HTML, CSS, and JavaScript, understanding their individual roles and how they work together to create interactive and responsive web applications.
- Get hands-on experience with popular front-end frameworks and libraries like Bootstrap and React.js, enabling you to build complex web applications more efficiently.
- Me as a junior frontend developer, My role is to collaborate with the development team to create visually appealing and user-friendly websites and web applications.
- I'll be working on the client-side of the projects, which involves designing and implementing the user interface and user experience.

PROJECTS

Glowing Skin care Product

Github :- <https://github.com/sachindolase/Glowing-Skin-Care-Product-Web>

Live Demo :- <https://glowing-skin-care-product-web.vercel.app/>

Tech Stack :- Html5, CSS3, Javascript, Font awesome, icons

- The luxury of radiant skin with our premium glowing skin care products. Our website, meticulously crafted with HTML, CSS, and JavaScript, invites you into a world of beauty and wellness.
- Explore our range of nourishing creams, rejuvenating serums, and revitalizing masks, all designed to enhance your natural glow. With our user-friendly interface and stunning design, finding the perfect skincare solution for your skin type has never been easier.
- Experience the transformative power of our products and discover a new radiance that shines from within. Shop now and reveal your skin's luminous potential!"

React redux toolkit CRUD app

Github:- <https://github.com/sachindolase/react-redux-toolkit-crud>

Live Demo : - <https://unrivaled-mu-n-f5475b.netlify.app/>

Tech Stack :- Html5, CSS3, javascript, React.js, React CRUD, React-Redux, Tailwind.CSS.

- The React Redux Toolkit CRUD App Project is a powerful and efficient web application that demonstrates the implementation of CRUD (Create, Read, Update, Delete) operations using React.js and Redux Toolkit.
Create: Users can easily create new items.user-friendly interface. Whether it's adding new products, tasks, or any other type of data.
- Read: The app efficiently fetches and displays existing data from the backend API,
- Update: The project demonstrates how to modify and update existing data in the application state and synchronize changes with the backend server, providing a smooth editing experience.
- Delete: Users have the ability to remove items they no longer need from the application. Redux Toolkit Integration: Leveraging the Redux Toolkit, the app manages the state of the application.

Exploding Kittens

Github :- <https://github.com/sachindolase/EMITRR-Exploding-Kittens>

Live Link :- <https://exploding-kittens.netlify.app/>

Tech stack :- javascript, node.js, express.js, react.js, nodemon, css

- Exploding kittens the objective of this exercise is to build a web-based game.
- This will be an online single-player card game that consists of 4 different types of cards, Cat card, Defuse card, Shuffle card, Exploding kitten card. There will be a button to start the game.

Food Delivery App

Github :- <https://github.com/sachindolase/food-delivery-app>

Tech stack :- javascript, express.js, react.js, mongodb

- This project is a full-stack food delivery application the app provides a seamless platform for users to browse restaurants, explore menus, and place food orders.
- User Authentication: Secure login and signup using JWT.
- Menu Browsing: Interactive UI to view restaurants and their offerings.
- Order Management: Add items to the cart, place orders, and track order status in real-time.
- Admin Dashboard: Manage restaurants, menus, and orders efficiently.
- Responsive Design: Optimized for mobile and desktop experiences.

EDUCATION

MCA (Full stack Development)

2022 - 2024

Collage Name :- Ajeenkya D Y Patil University Of Pune

CGPA :- 8.24

BBA(CA)

2017 - 2020

Collage Name :- Maharaja Sayajirao Gaikwad Art's, Science and Commerce collage of Malegaon.

Percentage :- 59.60% / Class :- Higher second class.
