| ▪ Node js | ▪ Java | | |

WORK EXPERIENCE

TISSA Technology

Software Developer - Python

02/ 2025

- Working on the KidsKart project, which includes three types of user logins: Admin, Agent, and Retailer.
- Admin can add products, while Retailers can view them.
- Focused on developing scalable APIs using Django and ensuring smooth backend operations.
- Actively involved in debugging and fixing both client-side and server-side issues for optimal functionality.

InDeft Technology Solutions Pvt. Ltd.

Fullstack Developer

01/ 2024 – 01/ 2025

- As a Jr. Software Developer, I am actively involved in various live projects focusing on developing end-to-end solutions and solving bugs using cutting-edge technologies and best practices.
- Responsible for designing and developing APIs using Django, ensuring smooth and scalable backend operations.
- Conducting bug fixes and debugging both client-side and server-side code to ensure optimal functionality
- Writing efficient, maintainable, and reusable code for both frontend and backend components, focusing on performance and scalability.

PROJECTS

CIO Klub

- Technologies- Python, Django, Postgress, React js, Core Ui, Javascript, HTML,CSS, Bootstrap.
- The CIO Klub is a group of top digital leaders called digital masterminds. It's organized into chapters, each with a managing committee. They work under a central governing body to achieve nationwide tech goals. The focus is on sharing knowledge, collaboration, and promoting innovative tech strategies among Chief Information Officers (CIOs) and tech leaders. The aim is to advance the digital landscape and enhance the role of tech leadership for overall organizational success .
- [Live site here](#)

Wind Quality Application

- Technologies- Python, Django, Postgress, React js, Core Ui, Javascript, HTML,CSS, Bootstrap.
- Developed a comprehensive application for managing the quality assurance process in wind energy generation. This application includes the design and management of checklists, facilitating efficient tracking and reporting of quality-related tasks and monitor task on different role base dashboard.

Music Recommendation System

- Technologies- Python, Data Science, Machine Learning
- Developing an innovative music recommendation system that uses facial expression recognition to offer personalized

music suggestions. By analyzing users' facial expressions in real-time, the system detects their emotional state and recommends songs or playlists tailored to their current mood.

- The user interface is built with Streamlit, allowing for an interactive, user-friendly experience. Streamlit enables real-time emotion analysis and dynamic music recommendations, providing a seamless and engaging way for users to discover music that matches their mood.

INTERNSHIP

LetsGrowMore

2022

Data Science Internship

Pune, India

- Gained hands-on experience with key tools and technologies in data science, including Python, Pandas, NumPy, and Matplotlib.
- Learned and applied data manipulation and cleaning techniques to prepare datasets for analysis.
- Worked with data visualization tools to present findings and results in an accessible and meaningful way.
- Participated in team projects, collaborating with peers to solve real-world data science challenges.

TRAINING

Vinsys [Under Generation India]

2023-2024

Java FullStack

- Mastered essential technologies required to build dynamic and responsive web applications, including Java, Spring Boot, HTML, CSS, JavaScript, and Angular.
- Gained in-depth knowledge of **RESTful APIs**, enabling the development of efficient and scalable backend systems.
- Collaborated with peers on team-based projects to develop full-stack applications and solve real-world development challenges.

ByteXL

2022

Python Training

Pune, India

- Gained a strong foundation in **Python programming**, covering core concepts such as data types, loops, conditionals, functions, and object-oriented programming (OOP).
- Mastered key libraries and frameworks such as **NumPy**, **Pandas**, and **Matplotlib** for data manipulation, analysis, and visualization.
- Applied **Python** in various domains such as **web development**, and **data science**.

TECHNICAL SKILLS

Languages: Python, Django, Postgress, React js, Node js, JavaScript, SQL, HTML, CSS

Developer Tools: VS Code, Jupiter Notebook, MySQL Workbench, Powerbi, IntelliJ Idea Ultimate, Pg Admin,

Technologies/Frameworks: GitHub

Familiar With: AI/ML, Bootstrap, Spring Boot
