EDUCATION

Institute of Engineering and Rural Technology

B.Tech. in Computer Science , CGPA: 8/10.0

Allahabad, UP

*November 2021 – May 2025**

PROJECTS

Cloud IDE | [Github](#)

may 2024

ReactJS, NodeJS, Docker, Kubernetes, REST API, WebSocket

- Built a cloud-based Integrated Development Environment (IDE) supporting multiple programming languages.
- Implemented real-time code collaboration using WebSockets for enhanced developer teamwork.
- Utilized Docker and Kubernetes to create isolated development environments for scalability and deployment.
- Developed backend services with Node.js and REST APIs to handle file management, compilation, and execution of code.
- Designed an intuitive user interface with ReactJS for seamless coding and project management.

BuddyPlayer | [Github](#) |

December 2023

React, Node.js, Express.js, MongoDB, REST API, MaterialUI

- Developed an interactive media player platform using React for the front end and Node.js for the backend.
- Implemented functionalities like media upload, playlist management, and playback features.
- Created a responsive and engaging user interface using MaterialUI for better user experience.
- Utilized MongoDB for user data storage and Express.js for API management, ensuring seamless data interaction.

Attendance Management System | [Github](#)

december 2023

MERN Stack (MongoDB, Express.js, React, Node.js), Bootstrap, REST API

- Developed a full-featured attendance management system using the MERN stack for educational institutions.
- Implemented functionalities such as marking attendance, generating attendance reports, and tracking student progress.
- Created an intuitive and easy-to-use dashboard for administrators and teachers using React and Bootstrap.
- Utilized MongoDB for efficient storage of attendance records and user data.

Image Resizer | [Github](#)

nov, 2023

Python, img2pdf

- Developed a Python-based desktop application for efficient image resizing and image-to-PDF conversion.
- Implemented **image resizing algorithm to reduce pixel count** while preserving image quality.
- Utilized the img2pdf library for seamless image-to-PDF conversion.
- Created a user-friendly interface for entering image location, size input, and output format choice.

TECHNICAL SKILLS

Frontend: HTML, CSS, Tailwind CSS, Bootstrap, Shadcn, JavaScript, TypeScript, React, Next.js

Backend: Node.js, Django, Express, RESTful APIs

Databases: MongoDB, SQL, NoSQL, Mongoose ODM

Version Control System: Git, GitHub

Programming Languages: Python, C, C++, JavaScript, TypeScript

ACHIEVEMENTS

Solved **500+ Data Structures and Algorithms problems** over platforms like LeetCode, GeekForGeeks, CodingNinjas and CodeChef.

HACKCBS 5.0, Hackathon , were among **Top 10 teams** to qualify for final round.
