Profile Summary

Highly motivated Software Developer with a strong foundation in Java, React.js, JavaScript, HTML, CSS. Eager to leverage my skills in a dynamic team environment to contribute to innovative projects and engage in continuous learning. Adept at quickly learning new technologies and adapting to challenging tasks, with a strong commitment to delivering high-quality work.

Education

Bachelor of Technology in Computer Science, Sagar Institute Of Research And Technology	July 2021 - June 2025
• CGPA: 7.79/10	
Class-XII, CBSE Orion International School	2020 - 2021
• Percentage: 91.4	
Class-X, CBSE Orion International School	2018 - 2019
• Percentage: 77.7	

Skills

Technical Skills: Java | SQL | JavaScript | HTML | CSS | React js | Problem Solving | Node js | Express js

Core Subject: Object-Oriented Programming

Soft Skills: Good Communication | Leadership | Team Work

Projects

Food Delivery github.com/deepak14pandey/Food_Delivery.git	June 2024 - July 2024
---	-----------------------

Developed a responsive and user-friendly online food delivery platform using HTML, CSS, JavaScript, and React.js. The website allows users to browse menus and place orders from their favorite restaurants seamlessly. It features a curated list of restaurants with detailed menus and customer reviews, along with real-time order tracking and updates. The intuitive interface is optimized for both desktop and mobile devices, ensuring smooth navigation and an enhanced user experience. Key functionalities include dynamic filtering, sorting, and search capabilities, all powered by React's component-based architecture and efficient state management. This project showcases my expertise in front-end development, problem-solving, and creating engaging user interfaces.

Responsibilities

- Created a responsive front-end using HTML, CSS, JavaScript, and React.js.
- Developed a robust back-end using Node.js and Express.js to support server-side functionality.
- Integrated APIs for seamless communication between the front-end and back-end.

Smart Home Automation (IOT Project)	Nov 2023 - Dec 2023
--	---------------------

Designed and implemented a smart home automation system using Node MCU and the Blynk app. The system allows users to remotely monitor and control various home appliances such as lights, fans, and other devices through a user-friendly mobile interface. Key features include real-time device status updates, scheduling for automated operations, and energy-efficient functionality. The project leverages IoT technology to enhance convenience and energy management, showcasing my skills in hardware integration, IoT development, and mobile app interfacing. This solution highlights my ability to create innovative and practical technology-driven systems for modern living.

Responsibilities

- Selected and configured Node MCU as the microcontroller for the system.
- Programmed the Node MCU using Arduino IDE with embedded C/C++ for controlling hardware components.
- Designed the mobile app interface on the Blynk platform to control appliances and monitor sensors.

ACHIVEMENT

Participated in Inter-Collage Level Hackathon: Developed a healthcare website using HTML, CSS, and JavaScript .

Achieved CodeChef Problem Solver-Silver Badge: Achieved for Solving 200+ problems on CodeChef.
