PROFILE

A CSE Data Science student with a 7.1 GPA, well-versed in Python, SQL, HTML, and CSS. I have a solid understanding of core concepts like computer architecture and operating systems. I'm passionate about emerging technologies and love finding innovative, data-driven solutions to challenges. Combining hands-on experiences with my academic knowledge, I'm eager to contribute meaningfully to the tech world.

SKILLS

Python

SQL

HTML CSS

C

Critical thinking

EXPERIENCE

Data Analysis Intern

June 2024 - August 2024

Worked as a data analysis intern for **IBM** wherein gained practical and hands on experience working on several real-life problems like drawing useful insights from given datasets. Real life application of concepts like regression for model training in python.

Tester

December 2024

Active participation in User Trials for **Nothing India** in their pre-production user trials for their devices and contributed feedbacks for the NothingOS 3.0 and in the camera testing team.

EDUCATION

- APJ Tech. University
GCET, Gr. Noida (UP)

2022-2026

B Tech CSE (Data Science)

-CBSE

St. Joseph's Convent
Ratlam (MP)

2020-2021

Intermediate 86.8%

Physics, Math, Informatics Practices

2018-2019

High School 95.6%

Science, Math, IT, Hindi, English,
Social Studies

PROJECT:

A Python-based billing program generates receipts with unique IDs, detailed sales summaries, and visual reports like bar graphs for customer spending and pie charts for daily commodity sales. It auto-organizes dated bills and reports into folders and secures data in a MySQL database, ensuring resilience against accidental shutdowns. Designed for simplicity and robustness, it's an efficient tool for small-scale shopkeepers in India.
