

KHUSHBU NIRMAL

Software Engineer

SUMMARY

I have four years of experience in Python development, with proficiency in the Django framework for web-based applications and PyQt for desktop applications. My background includes frontend development, along with a solid understanding of Django Rest Framework. I am adept at working on both Linux and Windows systems and possess knowledge of Docker and Continuous Integration/Continuous Deployment (CI/CD) practices.

EDUCATION

Gujarat Technological University

Bachelor's Degree in Information Technology
2016 – 2020

SKILLS

- Django ORM
- Docker
- MySQL
- CSS
- HTML
- Selenium
- BeautifulSoup
- WebAutomation
- Bootstrap
- Python
- Django
- Git
- Javascript
- Pandas
- DjangoRestFramework
- CICD

CERTIFICATIONS

- Git Complete: The definitive, step-by-step guide to Git Certification
- Gitlab CI – A Complete Hands-On for CI/CD Pipelines & DevOps Certification
- Ultimate AWS Certified Cloud Practitioner CLF-C02 Certification

PROFESSIONAL EXPERIENCE

System Engineer

Tata consultancy Services | 12/2022 – Present

- Designed customizable road and traffic simulation models in Python using PyQt5, incorporating features such as lane changing and lateral offsets.
- Developed TCP communication between two protocols, with one running on Linux and the other on Windows.
- Created Docker containers ensuring compatibility across ARM64 and AMD64 architectures,
- Created Parent-Child pipelines. Developed both static parallel and dynamic parallel jobs.

Python Developer

Tecocraft Infusion | 4/2022 – 11/2022

- Optimized data formatting and backend configurations for enhanced performance.
- Designed user-friendly interfaces for improved usability.
- Developed intuitive Django dashboards for effective data visualization.
- Integrated Stripe, PayPal, and Razorpay for secure payment processing.
