EXPERIENCE

Netzwala Services Pvt Ltd, Patna – Associate Consultant Development

05/2024 - present

Smart Aleck / Yaqin AI / Sarah Bot/ Stock Data Management

Worked as the Python Backend Developer to deliver the Project Like Smart Aleck, Yaqin AI and Sarah Bot etc.

- Developed Smart-Aleck, a RAG web app for streamlined legal information access using advanced data scraping stores, and retrieval data technologies and also multiple User Authentication with login and signup API.
 - Technology Used:** Python, Django, Lang chain, REST API, Pandas, NumPy, Skit Learn, Machine Learning,
- Yaqin AI, an intelligent investigation platform to enable efficient access to intelligence data for better decision-making;
 - Technology Used:** Python, Django, OSINT, Gemini PAID API, REST API, Pandas, NumPy, Skit Learn Machine Learning,
- Sarah Bot a lead management web app designed to streamlined client lead management, improving communication and campaign tracking
 - Technology Used** Python, Redis, Microsoft Graph API, DRF

Stemrobo Technologies, Noida - Innovation Engineer

06/2023 - 04/2024

Learning Management System / Stemrobo Website

- Developed an end-to-end pipeline for the LMS using Django and MySQL for robust user interface and data management and also signup and login Authentication for admin, Teacher, Student.
- Integrated front-end and back-end technologies to deliver a seamless user experience and secure data handling.

Technology: Python, Django, Redis, Postgres, JavaScript, ORM, Django Rest Frame work

PROJECTS

1. RAG (Retrieval-Augmented Generation):

[\(Link\)](#)

The RAG (Retrieval-Augmented Generation) Bot is an Intelligent Conversational agent designed to process and retrieve information from uploaded documents (PDFs). The bot leverages the power of Lang chain, OpenAI's Language models, and Chroma DB for efficient data storages and retrieval. The Primary goal of the project is to create a bot that can understand, analyze, and respond to user queries based on the content of uploaded files.

Technology Used: Django, Python, Lang chain, Chroma DB, JavaScript, REST API, NumPy, Pandas, Machine Learning

2. College Website

[\(Link\)](#)

- Worked on a real- world College website Project clone backend in Django so that users can college website Upgraded UI.
- Built feature like Authentication and Authorization with Django and ORM security implemented with multiple Access of Teacher and Student.
- Read Captcha Using Web Scrapping using Beautiful Sofy and save AWS Buket.

Technology Used: Django, Python, AWS, JavaScript, Web Scrapping

EDUCATION

Arya College of Engineering & IT, Jaipur

B. Tech Electronic and Communication

July 2018 - May 2022 CGPA – 8.50

SKILLS

- Strong:** Python, Web Developpement Machine Learning
- Intermediate:** Django, flask, F A S T A p i , Rest Api, Machine Learning, Deep Learning. MySQL. ORM, Kafka, Spark, Redis, TensorFlow, Pytorch, YOLO, NumPy, Pandas, Skit learn, Lang chain, Beautiful Sofy, Git, GitHub, Gitlab, AWS, LLM, MariaDB
- Beginner:** JavaScript, Node.js React, PostgreSQL

ACHIEVEMENTS

- 6th rank in **Hackfest**, an annual Hackathon organized by the Here Technology.
- Selections in **SIH** grand Finale 2020
- Awarded “**Star of the Month**” for two consecutive month in Stemrobo
- Secured 11th** position in startup and innovations **among 200** participants conducted by Arya institute of Engineering and **Secured 10th** position in RTU Hackathon **among 300+** participants .

POSTIONS OF RESPONSIBILITY

- Volunteered at **zypher**, an annual cultural event organized by ECE Society
- Volunteered at the SIH.

EXTRACURRICULARS

- Cricket
- chess

COMPETITIVE PROGRAMMING
