SUMMARY

Full Stack Web Developer with a strong foundation in designing and building responsive, scalable, and secure web applications. Experienced in developing dynamic user interfaces and robust backend systems while ensuring seamless performance and cross-browser compatibility. Passionate about delivering clean, maintainable code and solving real-world challenges through innovative web solutions.
Open for internship opportunities at Centilytics. Ready to contribute and learn!

TECHNICAL SKILLS

Figma Canva	Django	My SQL SQLite
HTML CSS Javascript React	Django REST Framework	Git GitHub
Bootstrap Tailwind CSS	JWT Authentication	AI ML DL Enthusiasts

SOFT SKILLS

Problem-Solving	Communication	Leadership
Collaboration	Critical Thinking	Time Management
Attention to Detail	Adaptability	

PROJECTS

Dentify AI

Developed Dentify AI, a deep learning-based Teeth Disease Classification System (TDCS) using CNNs. The system classifies dental conditions like cavities, implants, impacted tooth, and fillings, ensuring high accuracy through advanced preprocessing and model evaluation. It enhances diagnostic efficiency with real-time insights from dental images.

Multiple Disease Prediction System

Developed and implemented a comprehensive disease prediction system using machine learning models to predict the likelihood of diabetes, Parkinson's, and heart disease. Integrated advanced data preprocessing, feature engineering, and model evaluation techniques to ensure high prediction accuracy. The application enhances patient screening efficiency by providing real-time insights based on patient input data.

DIY Home Improvement Hub Platform

Designed and created an online platform that connects homeowners with expert DIY guides and tools for various home improvement projects. The platform features a community-based interface allowing users to share their projects and ideas, along with detailed step-by-step guides curated by professionals.

AVAILABILITY

Eager to learn, adapt, and grow in a fast-paced engineering environment. Looking forward to making meaningful contributions at Centilytics.

EDUCATION

Bachelor of Technology

Specialized in CSE - Artificial Intelligence & Data Science
SISTec - GN Bhopal, Madhya Pradesh

ACHIEVEMENTS

- TCS CodeVita Season 11 & 12 – Successfully participated and ranked among top contenders.
- Smart India Hackathon (SIH) 2023 & 2024 – Shortlisted twice for innovative project submissions.
