Publications

LINK-US (MERN Chat App)

Journal-iiie-india IE
8 May 2024

Published a detailed research paper on "Link-Us," a chat application developed using the MERN stack (MongoDB, Express.js, React, Node.js). The paper explores the app's architecture, implementation of real-time communication features, user authentication, and database management.

Result-Driven and highly motivated engineering student in computer science . Eager to apply my technical skills, problem solving abilities, and passion of software development in a challenging and dynamic environment, where I can contribute to innovative projects, learn from experienced professionals.

Education

Medi-Caps University **2020-2024**
Computer Science Engineering
8.6 CGPA

Vivekanand Rashtriya Vidhyalaya **2019-2020**
PCM
84%

Projects

Blood Bank Managment system **2022**
Implemented in C++ utilizing OOPs principles.

The system streamlines the management of donor information, blood stock levels, and distribution, improving operational efficiency and ensuring timely availability of blood for patients.

Weath-Track **Sep 2023 - Dec 2023**
Weather Prediction and Forcasting web application

"Weath-Track" is a weather forecasting web app powered by Python, machine learning, and MySQL. It features an intuitive interface built with HTML, CSS, and JavaScript. The project showcases skills in predictive modeling and full-stack development.

LINK-US **Feb 2024 - April 2024**
MERN Stack Web Chat App

"Link-Us" is a dynamic real-time chat app developed using the MERN stack, featuring secure data handling, user authentication, and a responsive interface. It reflects strong capabilities in full-stack development and delivering collaborative solutions.

Internship / Workshop

Main Flow Services and Technologies Pvt. Ltd. **Oct 2024 - Dec 2024**
Java Full Stack web development Indore

Completed a two-month internship in Java Full Stack Web Development at Main Flow Services and Technologies Pvt. Ltd. Gained hands-on experience in designing and building web applications, working on both front-end and back-end technologies. Actively contributed to projects, showcasing strong problem-solving and adaptability. Demonstrated professionalism and a passion for learning, enhancing expertise in full-stack development.

RPA (Robotics Process Automation) **Jun 2023 - July 2023**
Blue Prism Associate Dveloper Indore

Developed and deployed automated processes using Blue Prism, resulting in improved efficiency and reduced manual workload. Created and maintained process documentation, including process design, workflows, and exception handling.

Gained hands-on experience in Blue Prism components, including process studio, control room, and object studio. Enhanced problem-solving and analytical skills by working on real-world RPA projects
